

## Job Posting

<b>Job ID:</b>	WEBDEV
<b>Job Title:</b>	Web Developer
<b>Start Date:</b>	Immediate
<b>Compensation:</b>	DOE
<b>Job Location:</b>	Dallas, Texas, USA

### Description

BinaryWave, a leading provider of Enterprise SharePoint Solutions throughout the US and Europe, is seeking experienced, energetic, talented and results-oriented professionals to join our team of world-class SharePoint specialists. Qualified candidates will be expected to excel at delivering highly-customized, mission-critical, out-of-the-ordinary solutions to clients across a broad range of industries. This is an opportunity to learn the latest Microsoft technologies, including SharePoint 2007, .NET 2.0/3.0, WWF, and SQL 2005, in a fast-paced, challenging and enriching development environment.

### Responsibilities

Responsibilities of a Web Developer include:

- Develop enterprise SharePoint applications using C#, ASP.NET, Windows Workflow Foundation, SQL 2005, AJAX, XML, and Web Services
- Manage feature implementation and quality assurance for assigned projects
- Perform requirements gathering and create technical specifications
- Maintain coding standards and best practices
- Participate in community efforts, including blogs, newsgroups and events

### Qualifications

Candidates must possess the following:

- 2+ years enterprise web application development in C#, ASP.NET, XML and SQL
- 2+ years in fast-paced team development environment
- Proven track record delivering mission-critical applications within established timelines
- Excellent communication skills
- Ability to interact directly with clients at the technical level
- Microsoft certification strongly encouraged
- Experience with Microsoft SharePoint Server 2003, 2007, or WSS v2.0/3.0 a plus

### Travel

Some travel may be required.
